# Rabiu Muhammad

Software Engineer — Full-stack

Abuja, Nigeria (UTC+1) · mrabiu321@gmail.com · +234 816 333 8274 · portfolio-livid-ten-27.vercel.app · linkedin.com/in/rabiu-muhammad-b17a452b1 · github.com/DarkVayder

## SUMMARY

Full-stack software engineer with four-plus years of professional experience (since 2022). Has shipped five production platforms across three markets (Switzerland, the UK and Nigeria): tax filing, escrow-backed payments, a real estate marketplace and e-commerce checkout. Works across the whole stack in TypeScript (React and Next.js on the client, Node.js and NestJS on the server) and owns features from architecture to production.

## EXPERIENCE

**Software Engineer — Finclusion** 2026

- Build full-stack features across fintech and real-estate products (escrow and payment flows, multi-role dashboards, KYC, internal admin tooling) on React, Next.js and NestJS, integrated with the company's central single sign-on.
- **Spayce** (spayce.ai), real estate marketplace for sales, rentals, short-lets and hotel bookings: built role-specific journeys for six user roles on a React + Vite client and NestJS API, with route guarding so each role reaches only its own surface.
- Implemented escrow-held payments for viewings, short stays and sales so funds release only when the agreed step is confirmed; added KYC/KYB verification, listing verification badges and an upfront cost calculator.
- Audited every Spayce user journey role by role and closed the gaps found (unguarded routes, missing notifications, incomplete payment flows); built an activity and error monitor so client-side failures reach the admin team before users report them.

**Frontend Developer — Mindgrid Technologies** 2026

- **SabiTrack** (sabitrack.com), escrow-backed project management: built the B2B dashboard that enterprises and vendors use for milestone tracking, approvals and audit history.
- Integrated the dashboard with the platform's REST APIs as a pure client, with no server routes of its own.

**Software Engineer — SparkStrand** 2025

- **TaxDone** (app.taxdone.ch), tax-filing platform: worked across the stack on the client app (Next.js, React, Node.js, Express) and shipped it in English, German and French from a single codebase; built the market-entry site for its expansion from Switzerland into Nigeria.
- **VentureDirection** (venturedirection.com), multi-tenant business platform: built a shared component layer that renders identically on web, React Native and desktop, plus the role-based views for enterprise tenants.
- **Nicely Polished** (nicelypolished.com), UK e-commerce: built the storefront end to end, including catalogue, cart, checkout, multi-currency pricing and a loyalty points system.

**Freelance Software Engineer — Self-employed** 2022 – Present

- Built and shipped web applications for clients, from Figma designs to production.
- Translated designs into accurate, responsive UI and integrated REST APIs on every build.

## ADDITIONAL EXPERIENCE

**Software Developer** — Camie · TypeScript, Next.js, React, Node.js 2025

**Web Developer** — Isaac Consolidates · JavaScript, Next.js, React, Python 2025

**Frontend Developer (Internship)** — HNG · React, JavaScript, Figma 2024

## SKILLS

| | |
|---|---|
| **Languages** | TypeScript, JavaScript |
| **Frontend** | React, Next.js, React Native, Tailwind CSS, Redux, accessibility, responsive design |
| **Backend** | Node.js, NestJS, Express, REST APIs |
| **Data** | PostgreSQL, MongoDB, Firebase |
| **Design** | System architecture, API design, data modelling, authentication and RBAC |
| **Tooling** | Git, Vite, Docker, Figma |
